PROFESSIONAL OPINION

This summary should be read in conjunction with the full report. The Professional Opinion below summarises the risks and other potential issues associated with the property. The Professional Opinion results are displayed as GREEN for PASS, GREEN for PASS WITH ADVISORY, and RED for FURTHER ACTION. A PASS is given if there is no specific risk. A ‘PASS WITH ADVISORY’ is given where there is no specific risk from an environmental perspective, but where the client should be made aware of the feature(s) and/or information within the section as they may consider it affects their quiet enjoyment of the property. A ‘FURTHER ACTION’ is given if there is a specific risk and a specific further action is advised. The Pass, Pass with Advisory, or Further Action results should be disclosed to client and /or lender and / or insurer as appropriate. The Professional Opinion is summarised below. The Professional Opinion summary will indicate where more details on Advisory or Further Actions are available in the body of the report.

In the event of a request to review the Professional Opinion based on additional information, or any technical queries, the professional advisor who ordered the report should contact us at info@futureclimateinfo.com or call 01732 755 180.
1 ENERGY & INFRASTRUCTURE

1.01 ENERGY MAP

Data provided by the Department of Energy & Climate Change (DECC) indicates that the property is not within 1000 metres of any underground Carbon Storage Activities.

It should be noted that, in the UK all carbon storage sites are to be located under the seabed beneath the North Sea.

1.03 CARBON CAPTURE & STORAGE  |  PASS

Data provided by the Department of Energy & Climate Change (DECC) indicates that the property is not within 1000 metres of any underground Carbon Storage Activities.

1.04 ELECTRICAL INFRASTRUCTURE | ELECTRICITY PYLONS  |  PASS (WITH ADVISORY)

Data provided by the Ordnance Survey indicates that the property is within 250 metres of one or more major electricity pylons.

Electric and Magnetic Fields (EMFs) are produced wherever electricity is used. There are guidelines to limit exposure to electric and magnetic fields (exposures in the home are usually well below these guideline levels). There is contradictory evidence to link EMF’s to both long and short term health risks, further information and advice is available from Public Health England at www.gov.uk/government/collections/electromagnetic-fields, or from www.emfs.info.

ADVISORY: Electrical infrastructure can emit Electric and Magnetic Fields (EMFs). National Grid operate an EMF Unit for those concerned about nearby electricity equipment. They can provide relevant information, and if necessary will undertake field measurements. For further information, contact the EMF Unit on 0845 702 3270 or by email at emfhelpline@nationalgrid.com. However, you can also measure EMFs yourself with the use of a gaussmeter, which can be purchased online.

1.05 ELECTRICAL INFRASTRUCTURE | OVERHEAD POWER LINES  |  PASS

Data provided by the Ordnance Survey indicates that the property is not within 250 metres of any major overhead electricity transmission lines.

1.06 ELECTRICAL INFRASTRUCTURE | POWER CABLES AND LINES  |  PASS

Data provided by the National Grid indicates that the property is not within 250 metres of any power lines or cables.

1.07 ELECTRICAL INFRASTRUCTURE | SUBSTATIONS  |  PASS

Data provided by the Ordnance Survey indicates that the property is not within 25 metres of any electricity substations.
# Energy Residential ≤ 10ha

### 1.08 Hydropower | Existing

Data provided by the Environment Agency indicates that the property is not within 250 metres of a Hydropower Generation Scheme.

### 1.09 Hydropower | Potential

Data provided by the Environment Agency indicates that the property is not within 250 metres of a potential hydropower opportunity.

### 1.10 Major Energy Infrastructure | Gas Pipe

Data provided by the National Grid indicates that the property is not within 250 metres of a high pressure gas pipeline.

### 1.11 Major Energy Infrastructure | Gas Site

Data provided by the National Grid indicates that the property is not within 250 metres of a high pressure gas facility.

### 1.12 Major Infrastructure Projects | Crossrail

Data provided by Crossrail indicates that the property is not within 1000 metres of a Crossrail construction programme.

### 1.13 Major Infrastructure Projects | HS2

Data provided by High Speed 2 (HS2) indicates that the property is not within 3000 metres of the HS2 Route, as announced in July 2017.

### 1.14 Major Infrastructure Projects | Thames Tideway Tunnel

Infrastructure planning data indicates that the property is not within 500 metres of the Thames Tideway Tunnel.

### 1.15 Oil and Gas | Invitation Area (Inc. Shale Gas)

Data provided by the Department of Energy & Climate Change (DECC) indicates that the property is within an area for which Petroleum Exploration and Development Licence (PEDL) applications have been invited in the 14th Landward Licensing Round. Please bear in mind that these areas are quite large, almost half of the country was included in the 14th round.

The main reason for the 14th Round was to facilitate exploration for shale gas. Shale gas (methane) is trapped in impermeable shale rock. Hydraulic fracturing (or ‘fracking’) of the shale rock enables the shale gas to flow. Fracking has been used in the UK for many years but recent improvements in technology have made the exploitation of shale gas reservoirs more economical.

A PEDL is the first step to starting drilling, but it does not imply prior consent to actual activities. An operator wishing to drill an exploratory well must first negotiate access with landowners, as well as obtain consents from a number of bodies, including planning permission and environmental permits. DECC will only give consent to drill once the planning authority has granted permission to drill, and if the relevant planning conditions have been discharged. An operator wishing to start production from a development site must start again with the permissions process.

If a PEDL licence is granted, it will appear below, under ‘Oil and Gas | Current and Historic Sites’.

### 1.16 Oil and Gas | Offered Blocks (Inc. Shale Gas)

Data provided by the Oil and Gas Authority (OGA) indicates that the property is not within 25 metres of an area (“Block”) which was formally offered to companies in the 14th Round of Oil and Gas Licensing in August 2015.

Please note that a “block” is an area of land, typically 10km x 10km. No licences were issued on that date, successful companies for the 27 blocks that were offered in August 2015 were notified that they are going to be awarded a licence when the Habitats Regulations Assessments (HRA) for a further 132 blocks are completed.

### 1.17 Oil and Gas | Licensed Areas (Inc. Shale Gas)

Data provided by the Department of Energy & Climate Change (DECC) indicates that the property is in or within 25 metres of an area that is licensed for onshore Petroleum Exploration and Development.

This does not necessarily mean that shale gas, mine gas, coal bed methane, or conventional oil and gas exploration will occur, only that a licensee has the right to drill and explore within the area/block, subject to the necessary permissions.

Any available licence data will appear below. If there is any drilling/well information in relation to a site currently operating under a PEDL licence it will appear under ‘OIL AND GAS | CURRENT AND HISTORIC SITES’

1.18 OIL AND GAS | CURRENT AND HISTORIC SITES
PASS

Data provided by the Department of Energy & Climate Change (DECC) indicates that the property is not within 5000 metres of one or more sites that currently or formerly held a Petroleum Exploration and Development Licence (PEDL).

1.19 OIL AND GAS | UNDERGROUND COAL GASIFICATION
PASS

Data provided by the Department of Energy & Climate Change (DECC), indicates that the property is not within 5000 metres of any sites that are currently licensed for underground coal gasification.

1.20 POWER STATIONS
PASS (WITH ADVISORY)

Data provided by the Department of Energy & Climate Change (DECC), indicates that the property is within 3000 metres of an active power station.

Any infrastructure project has the potential to create blight caused by the uncertainty as to the project outcomes and this can affect the ability to buy and sell property in the affected areas. If any related data is available it will appear below.

ADVISORY: Electrical Infrastructure can emit Electric and Magnetic Fields (EMFs). National Grid operate an EMF Unit for those concerned about nearby electricity equipment. They can provide relevant information, and if necessary will undertake field measurements. For further information, contact the EMF Unit on 0845 702 3270 or by email at emfhelpline@nationalgrid.com. However, you can also measure EMFs yourself with the use of a gaussmeter, which can be purchased online.

1.21 POWER STATIONS | NUCLEAR POWER
PASS

Data provided by the Ordnance Survey indicates that the property is not within 3000 metres of a nuclear power station.

1.22 RAILWAYS
PASS (WITH ADVISORY)

Data provided by Ordnance Survey indicates that the property is located within 100 metres of railway infrastructure. Whereas these are usually obvious features please be aware that there may be associated rail traffic noise and vibrations, and occasional overnight noise from maintenance works.

ADVISORY: Railways can lead to Noise and Vibration which can be disruptive. Additional Noise can occur if the property is near a level crossing or similar, though a Night Time Quiet Period in which horns are only used in an emergency is in operation from 23:00 - 7:00. For more information on how railways can affect your property and who to contact in the event of disruptive noise/vibration please visit: https://www.networkrail.co.uk/communities/lineside-neighbours/noise-and-vibration/.

1.23 SOLAR FARMS
PASS (WITH ADVISORY)

Data provided by the Department of Energy & Climate Change (DECC) indicates that the property is within 3000 metres of one or more solar farm(s).
Any infrastructure project has the potential to create blight caused by the uncertainty as to the project outcomes and this can affect the ability to buy and sell property in the affected areas. If any related data is available it will appear below.

### 2.4 SEARCHCODE

**IMPORTANT CONSUMER PROTECTION INFORMATION**

This search has been produced by Future Climate Info Ltd, 17 Kings Hill Avenue, Kings Hill, West Malling, Kent, ME19 4UA, Telephone 01732 755 180, Email: info@futureclimateinfo.com, which is registered with the Property Codes Compliance Board (PCCB) as a subscriber to the Search Code. The PCCB independently monitors how registered search firms maintain compliance with the Code.

The Search Code:

- Provides protection for homebuyers, sellers, estate agents, conveyancers and mortgage lenders who rely on the information included in property search reports undertaken by subscribers on residential and commercial property within the United Kingdom.
- Sets out minimum standards which firms compiling and selling search reports have to meet.
- Promotes the best practice and quality standards within the industry for the benefit of consumers and property professionals.
- Enables consumers and property professionals to have confidence in firms which subscribe to the code, their products and services.

By giving you this information, the search firm is confirming that they keep to the principles of the Code. This provides important protection for you.

**The Code's core principles**

Firms which subscribe to the Search Code will:
display the Search Code logo prominently on their search reports.
• act with integrity and carry out work with due skill, care and diligence
• at all times maintain adequate and appropriate insurance to protect consumers
• conduct business in an honest, fair and professional manner
• handle complaints speedily and fairly
• ensure that products and services comply with industry registration rules and standards and relevant laws
• monitor their compliance with the Code

Complaints

If you have a query or complaint about your search, you should raise it directly with the search firm, and if appropriate ask for any complaint to be considered under their formal internal complaints procedure. If you remain dissatisfied with the firm’s final response, after your complaint has been formally considered, or if the firm has exceeded the response timescales, you may refer your complaint for consideration under The Property Ombudsman scheme (TPOs). The Ombudsman can award compensation of up to £5,000 to you if the Ombudsman finds that you have suffered actual financial loss and/or aggravation, distress or inconvenience as a result of your search provider failing to keep to the Code.

Please note that all queries or complaints regarding your search should be directed to your search provider in the first instance, not to TPOs or to the PCCB.

TPOs Contact Details:
The Property Ombudsman scheme, Milford House, 43-55 Milford Street, Salisbury, Wiltshire SP1 2BP
Tel: 01722 333306, Fax: 01722 332296, Email: admin@tpos.co.uk, Web: https://www.tpos.co.uk/
You can get more information about the PCCB from www.propertycodes.org.uk

PLEASE ASK YOUR SEARCH PROVIDER IF YOU WOULD LIKE A COPY OF THE SEARCH CODE
