SUMMARY

Drainage and Water

The drainage and water enquiry does not show anything abnormal for a residential property, which would be a cause for concern. The property is connected to the mains water supply and public sewers, and is not recorded as being at risk of internal flooding due to overloaded public sewers. The property has not been identified as at risk of receiving low water pressure or flow. Water quality analysis for the water supply zone in which the property is situated, has met the prescribed standards.

We recommend that you read the full report and guidance notes to ensure you are fully informed about drainage and water at the property.

Flood

Landmark have provided flood information for the property. The flood risk from rivers and the sea within 25m of the property has not been identified. The risk of surface water flooding within 25m of the property is low, and the property's susceptibility to potential ground water flooding is low.

The insurance claim rating for the property is very low.

The property is not recorded as being at risk of internal flooding due to overloaded public sewers.

We recommend that you read the full report and guidance notes to ensure you are fully informed about flooding at the property.

To help understand the implications of the Drainage and Water Enquiries Report a summary guide to the content of the full report is provided below. This guide should be read in the context of and with reference to the full report and associated guidance notes.

The following 3 classifications have been used to highlight whether or not the response to a particular question is something that would normally be expected or otherwise. The classifications are intended purely as a guide to assist in the understanding of the Report and do not imply that the property is fit to purchase or otherwise and this decision will rest with the prospective purchaser and their professional advisers.

This response represents the typical situation for a residential property.

The attention of the purchaser is drawn to this response. Further information can be found in the Guidance Notes accompanying the relevant question. The purchaser may wish to make further investigations into this situation.

This response represents an uncommon situation for a residential property and the purchaser should carefully consider its implications.

Question

Answer

Map

1.1	Where relevant, please include a copy of an extract from the public sewer map.	Map Provided	✓
1.2	Where relevant, please include a copy of an extract from the map of waterworks.	Map Provided	✓

Drainage

2.1	Does foul water from the property drain to a public sewer?	Yes	✓
2.2	Does surface water from the property drain to a public sewer?	Yes	✓
2.3	Is a surface water drainage charge payable?	Yes	✓
2.4	Does map indicate any public sewer, disposal main or lateral drain within the boundaries?	No, See Details	📖
2.4.1	Does map indicate any public pumping station or ancillary apparatus within the boundaries?	No	✓
2.5	Does map indicate public foul sewer within 30.48 metres (100 feet) of buildings withing property?	Yes	✓
2.5.1	Does map indicate any public pumping station or ancillary apparatus within 50 meters?	No	✓
2.6	Are sewers/lateral drains serving/or which proposed, subject of an existing adoption agreement?	No	✓
2.7	Sewerage undertaker approved/consulted about plans for extension in vicinity public sewer etc?	No	✓
2.8	Is building at risk of internal flooding due to overloaded public sewers?	No	✓
2.9	Distance from property to nearest boundary of nearest sewage treatment works.	See Details	✓

Water

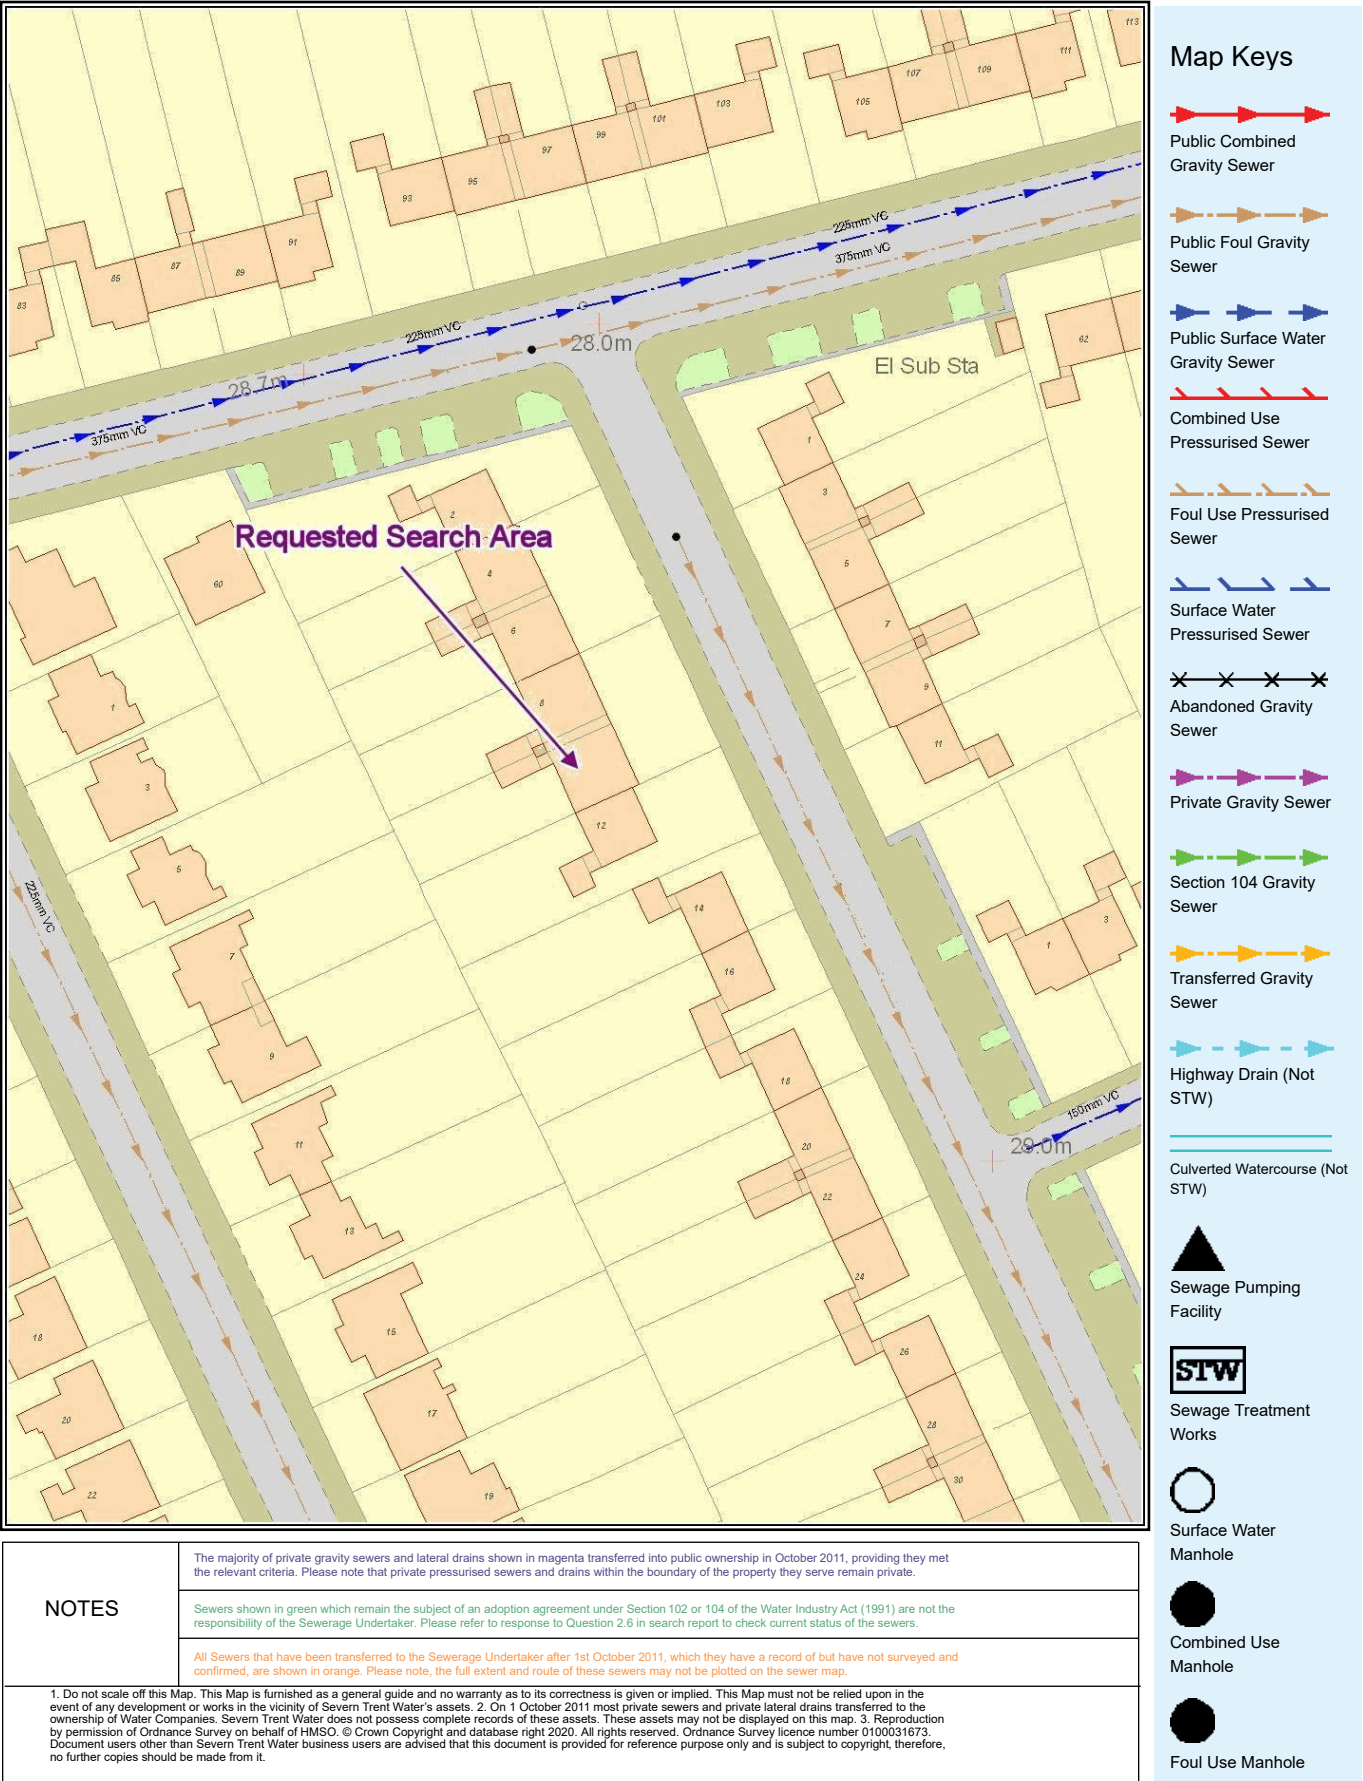

3.1	Is the property connected to mains water supply?	Yes	✓
3.2	Water mains, resource mains or discharge pipes within boundaries of property?	No	✓
3.3	Is water main/service pipe serving subject to existing adoption agreement or application?	No	✓
3.4	Is the property at risk of receiving low water pressure or flow?	No	✓
3.5	What is the classification of the water supply for the property?	See Details	📖
3.6	Please include details of the location of any water meter serving the property.	N/A	✓

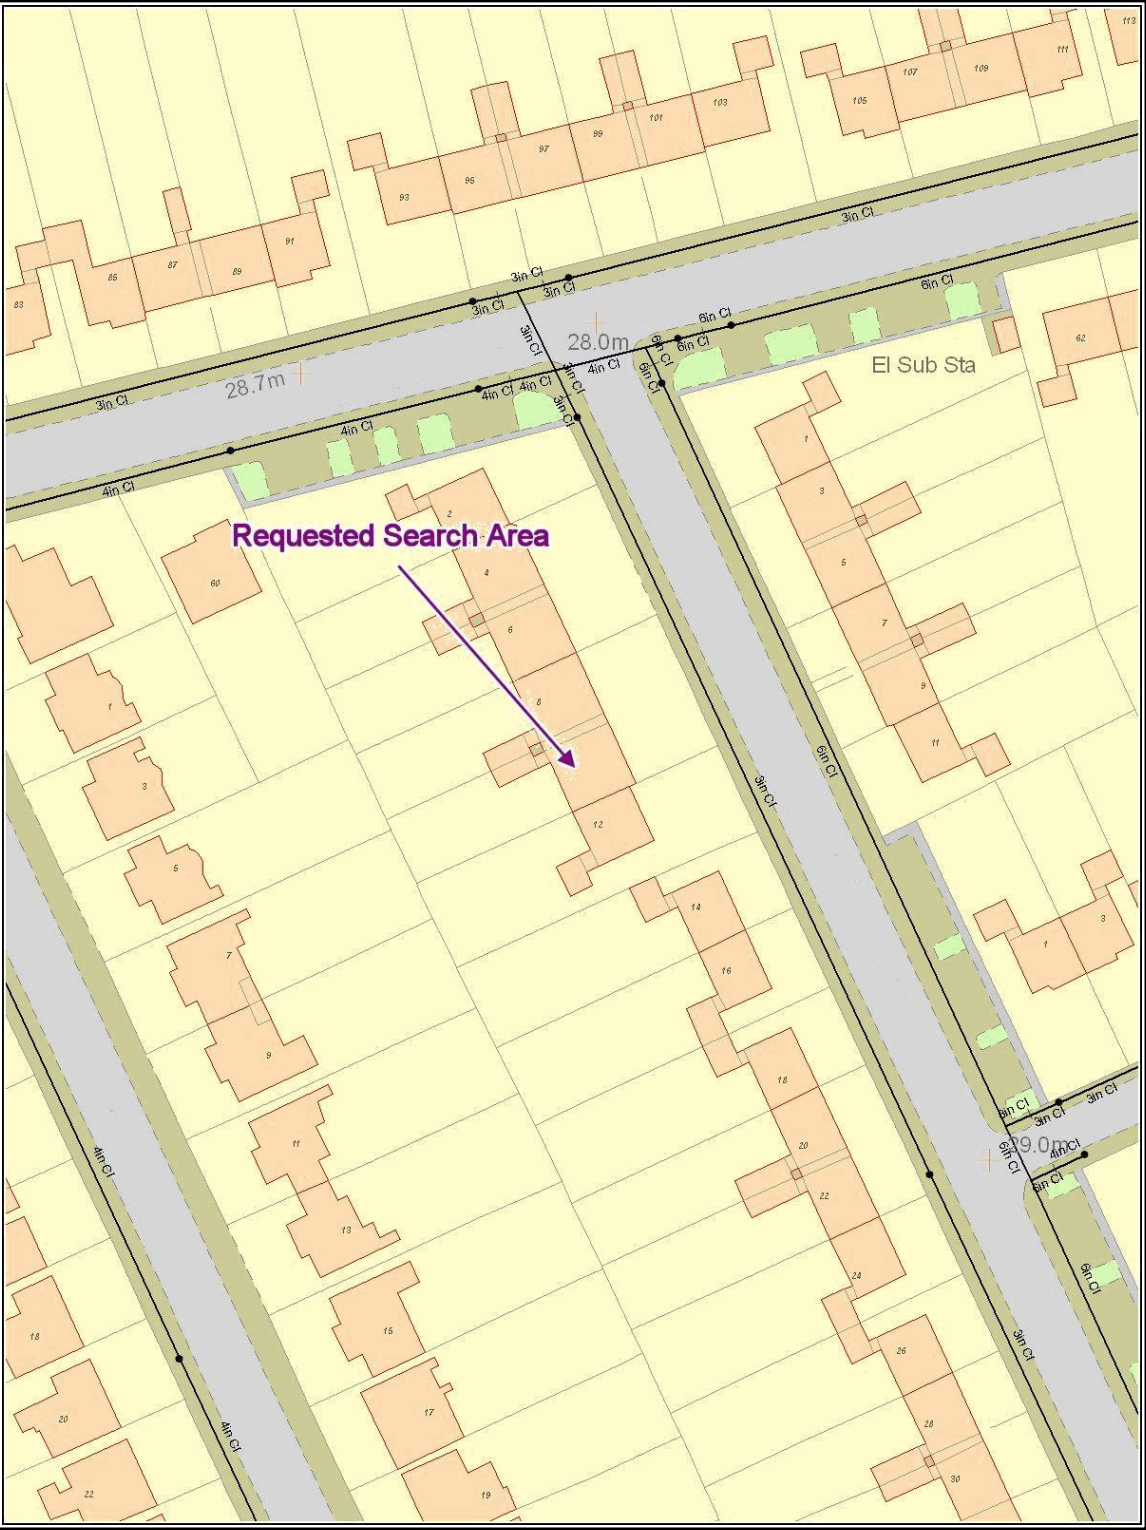

Charging

4.1.1	Who is responsible for providing the sewerage services for the property?	See Answer	✓
4.1.2	Who is responsible for providing the water services for the property?	See Answer	✓
4.2	Who bills the property for sewerage services?	See Details	✓
4.3	Who bills the property for water services?	See Details	✓
4.4	What is the current basis for charging for sewerage and water services at the property?	Unmeasured	✓
4.5	Basis for charging for sewerage/water services consequence of change of occupation?	See Details	✓

Flood

5.1	What is the risk of flooding from rivers and the sea within 25m of the property?	None identified	✓
5.2	Is the property in or within 25m of an area benefiting from flood defences?	N/A	✓
5.3	What is the risk of surface water flooding within 25m of the property?	Low	✓
5.4	What is the susceptibility of the property to potential groundwater flooding?	Low	✓
5.5	What is the insurance claim rating for the property?	Very Low	✓

NOTES

1. Do not scale off this Map. This Map is furnished as a general guide and no warranty as to its correctness is given or implied. This Map must not be relied upon in the event of any development or works in the vicinity of Severn Trent Water's assets. 2. Reproduction by permission of Ordnance Survey on behalf of HMSO. © Crown Copyright and database right 2020. All rights reserved. Ordnance Survey licence number 0100031673. Document users other than Severn Trent Water business users are advised that this document is provided for reference purpose only and is subject to copyright, therefore, no further copies should be made from it.

Question 1.1

Where relevant, please include a copy of an extract from the public sewer map.

A copy of an extract from the public sewer map is included in which the location of the property is identified.

Map Provided

Guidance Notes

Pipes that are shown on the public sewer map as sewers, disposal mains or lateral drains are defined as those for which the Sewerage Undertaker holds statutory responsibility under the Water Industry Act 1991. The Sewerage Undertaker is not generally responsible for rivers, watercourses, ponds, culverts or highway drains. If any of these are shown on the copy extract they are shown for information only. Sewers or lateral drains indicated on the extract of the public sewer map as being subject to an agreement under Section 104 of the Water Industry Act 1991 are not an "as constructed" record. It is recommended that these details are checked with the developer. Please note that following the private sewer transfer on October 1st 2011 there may be additional public assets other than those indicated on the map. Particular attention should be paid to public pumping stations (indicated on the plan by a black triangle) which will have associated pressurised sewers serving the pumping station which may not be plotted on the sewer plan even if they have transferred into public ownership. Assets other than public sewers, disposal mains or lateral drains may be shown on the copy extract, for information.

Question 1.2

Where relevant, please include a copy of an extract from the map of waterworks.

A copy of an extract from the map of waterworks is included in which the location of the property is identified.

Map Provided

Guidance Notes

Pipes that are shown on the map of waterworks as water mains, resource mains or discharge pipes are defined as those for which a Water Undertaker holds statutory responsibility under the Water Industry Act 1991. Assets other than water mains, resource mains or discharge pipes may be shown on the plan, for information only. Water Undertakers are not responsible for private water mains or private service pipes connecting the property to the public water main and do not hold details of these. These may pass through land outside of the control of the seller, or may be shared with adjacent properties. The buyer may wish to investigate whether separate rights or easements are needed for their inspection, repair or renewal. The extract of the map of waterworks shows water mains in the vicinity of the property. It should be possible to estimate the likely length and route of any private water supply pipe connecting the property to the public water network.

Question 2.1

Does foul water from the property drain to a public sewer?

Records indicate that foul water from the property does drain to a public sewer.

Yes

Guidance Notes

The connection status of the property is based on information held on the billing records by the responsible water company. Sewerage Undertakers are not responsible for any private drains and private sewers that do not connect the property to the public sewerage system, and do not hold details of these. The property owner will normally have sole responsibility for private drains serving the property and may have shared responsibility with other users, if the property is served by a private sewer which also serves other properties but does not connect into the public sewerage system. These may pass through land outside of the control of the seller and the buyer may wish to investigate whether separate rights or easements are needed for their inspection, repair or renewal.

Question 2.2

Does surface water from the property drain to a public sewer?

Records indicate that surface water from the property does drain to a public sewer.

Guidance Notes

The connection status of the property is based on information held on the billing records by the responsible water company. Sewerage Undertakers are not responsible for private drains and private sewers that do not connect the property to the public sewerage system and do not hold details of these. The property owner will normally have sole responsibility for private drains serving the property and may have shared responsibility, with other users, if the property is served by a private sewer which also serves other properties but does not connect into the public sewerage system. These may pass through land outside of the control of the seller and the buyer may wish to investigate whether separate rights or easements are needed for their inspection, repair or renewal. In some cases, Sewerage Undertaker records do not distinguish between foul and surface water connections to the public sewerage system. If on inspection the buyer finds that the property is not connected for surface water drainage, the property may be eligible for a rebate of the surface water drainage charge. Details can be obtained from the Sewerage Undertaker.

Question 2.3

Is a surface water drainage charge payable?

Records confirm that a surface water drainage charge is payable for the property of £110.78 for the current financial year.

Guidance Notes

Where surface water charges are payable but upon inspection the property owner believes that surface water does not drain to the public sewerage system, application can be made to the Water Company to end surface water charges.

Question 2.4

Does the public sewer map indicate any public sewer, disposal main or lateral drain within the boundaries of the property?

The public sewer map does not indicate any public sewers, disposal mains or lateral drains within the boundaries of the property. However, following the private sewer transfer on October 1st 2011 there are lateral drains and public sewers which are not recorded on the public sewer map. For properties of this type (see Appendix 3) built before 2011 we believe there may be an unplotted public sewer within the boundary following the transfer but individual property drainage arrangements should be checked, if required.

No, See Details

Guidance Notes

The approximate boundary of the property has been determined by reference to the Ordnance Survey record. A property of this type will normally connect to the public sewer initially via a drain, then a sewer shared with the neighbouring property. It is therefore common for a public sewer or lateral drain to be present within the boundary of this type of property built before 2011. Please note that from 1st October 2011 the majority of private sewers and lateral drains connected to the public network as of 1st July 2011 transferred into public ownership and therefore it is possible there may be additional public assets within or close to the boundary which may not be shown on the public sewer plan. Private sewers and lateral drains laid since 1st July 2011 will be transferred under a secondary scheme at a later date which is yet to be determined. The presence of public assets running within the boundary of the property may restrict further development. If there are any plans to develop the property further enquiries should be made to the sewerage undertaker's Build Over department. The sewerage undertaker has a legal right of access to carry out work on its assets, subject to notice. This may result in employees of the Company or its contractors needing to enter the property to carry out work.

Question 2.4.1

Does the public sewer map indicate any public pumping station or any other ancillary apparatus within the boundaries of the property?

The public sewer map does not indicate a public pumping station or other ancillary apparatus within the boundaries of the property. However, as of 1st October 2016, any pumping station that was constructed prior to 1st July 2011 and serves more than one property will become the responsibility of the sewerage undertaker. Although the sewerage undertaker has no record of any pumping station at this property there may be pumping stations which meet the adoption criteria which they are not aware of and are not recorded on the public sewer map.

No

Guidance Notes

The approximate boundary of the property has been determined by reference to the Ordnance Survey record. Please note that privately owned pumping stations built prior to 1st July 2011 which serve more than one property and pump to the existing public sewer are eligible for transfer into public ownership as of 1st October 2016. Pumping stations that serve a single property but sit outside the curtilage of that property will also be eligible for transfer. Please see Appendix 3 for further details. Any other ancillary apparatus is shown on the public sewer map and is referenced on the map key. A full glossary is also available on our website at www.severntrentsearches.com/glossary/

Question 2.5

Does the public sewer map indicate any public foul sewer within 30.48 metres (100 feet) of any buildings within the property?

The public sewer map included indicates that there is a public foul sewer or public sewer asset within 30.48 metres (100 feet) of a building within the property.

Guidance Notes

The public sewer map shows the location of public sewers. Please note that from 1st October 2011, private sewers and lateral drains connected to the public network as of 1st July 2011 transferred into public ownership and from that date there may be public sewers closer to the property than those shown on the map. The presence of a public foul sewer within 30.48 metres (100 feet) of the building(s) within the property can result in the Local Authority requiring a property to be connected to the public foul sewer. The measure is estimated from the Ordnance Survey record, between the building(s) within the boundary of the property and the nearest public foul sewer.

Question 2.5.1

Does the public sewer map indicate any public pumping station or any other ancillary apparatus within 50 metres of any buildings within the property?

The public sewer map does not indicate a public pumping station or other ancillary apparatus within 50m of a building within the property. However, following the transfer of some private pumping stations into public ownership, from 1st October 2016 there may be public pumping stations which are not marked on the public sewer map.

Guidance Notes

The public sewer map shows the location of public pumping stations, pressurised mains and other ancillary apparatus. Please note that privately owned pumping stations built prior to 1st July 2011 which serve more than one property and pump to the existing public sewer are eligible for transfer into public ownership as of 1st October 2016. Pumping stations that serve a single property but sit outside the curtilage of that property will also be eligible for transfer. Pumping stations also have pressurised sewers associated with them and these may not be plotted on the public sewer map if the sewerage undertaker is unaware of the pumping station. The presence of a pumping station, pressurised rising main or other ancillary apparatus may restrict further development. Please see Appendix 3 for further details. Any other ancillary apparatus is shown on the public sewer map and is referenced on the map key. A full glossary is also available on our website at www.severntrentsearches.com/glossary/.

Question 2.6

Are any sewers or lateral drains serving, or which are proposed to serve the property, the subject of an existing adoption agreement or an application for such an agreement?

The property is part of an established development and is not subject to an adoption agreement.

Guidance Notes

The majority of private sewers and lateral drains subject to adoption agreements were transferred into public ownership from 1st October 2011 and there may therefore be additional public sewers other than those shown on the plan. Further details can be found in Appendix 3. Buyers should consult with the current owner to ascertain the extent of their liability for privately held assets.

Question 2.7

Has a Sewerage Undertaker approved or been consulted about any plans to erect a building or extension on the property over or in the vicinity of a public sewer, disposal main or drain?

There are no records in relation to any approval or consultation about plans to erect a building or extension on the property over or in the vicinity of a public sewer, disposal main or drain. However, the Sewerage Undertaker might not be aware of a building or extension on the property over or in the vicinity of a public sewer, disposal main or drain.

No

Guidance Notes

Buildings or extensions erected over a public sewer, disposal main or lateral drain in contravention of building controls or which conflict with the provisions of the Water Industry Act 1991, may have to be removed or altered. Please note that from 1st October 2011 the majority of private sewers and lateral drains connected to the public network as of 1st July 2011 transferred into public ownership and there may therefore be formerly private sewers and lateral drains which will have been built over. Please visit www.severntrentsearches.com/category/sewer-transfer for further information.

Question 2.8

Is the building which is or forms part of the property at risk of internal flooding due to overloaded public sewers?

The property is not recorded as being at risk of internal flooding due to overloaded public sewers.

No

Guidance Notes

A sewer is "overloaded" when the flow from a storm is unable to pass through it due to a permanent problem (e.g. flat gradient, small diameter). Flooding as a result of temporary problems such as blockages, siltation, collapses and equipment or operational failures are excluded. "Internal flooding" from public sewers is defined as flooding which enters a building or passes below a suspended floor. For reporting purposes, buildings are restricted to those normally occupied and used for residential, public, commercial, business or industrial purposes. "At Risk" properties are those that the Sewerage Undertaker is required to include in the Regulatory Register that is reported annually to the Water Services Regulation Authority. These are defined as properties that have suffered or are likely to suffer internal flooding from public foul, combined or surface water sewers due to overloading of the sewerage system more frequently than the relevant reference period (either once or twice in ten years) as determined by the Sewerage Undertaker's reporting procedure. Flooding as a result of storm events proven to be exceptional and beyond the reference period of one in ten years are not included on the "At Risk" register. Please note that from 1st October 2011 the majority of private sewers and lateral drains connected to the public network as of 1st July 2011 transferred into public ownership. Details of formerly private sewers at risk from internal flooding are not recorded in the Regulatory Register and will not be added until a flooding occurrence. There may therefore be public sewers at risk from internal flooding that are not recorded on the "At Risk" register.

Question 2.9

Please state the distance from the property to the nearest boundary of the nearest sewage treatment works.

The nearest sewage treatment works is 0.694 KM to the East of the property. The name of the nearest sewage treatment works is Cropwell Bishop.

See Details

Guidance Notes

The nearest sewage treatment works will not always be the sewage treatment works serving the catchments within which the property is situated. The Sewerage Undertaker's records were inspected to determine the nearest sewage treatment works. It should be noted therefore that there may be private sewage treatment works closer than the one detailed above that have not been identified.

Question 3.1

Is the property connected to mains water supply?

Records indicate that the property is connected to mains water supply.

Yes

Question 3.2

Are there any water mains, resource mains or discharge pipes within the boundaries of the property?

The map of waterworks does not indicate any water mains, resource mains or discharge pipes within the boundaries of the property.

No

Guidance Notes

The approximate boundary of the property has been determined by reference to the Ordnance Survey record. The presence of a public water main, resource main or discharge pipe within the boundary of the property may restrict further development within it. Water Undertakers have a statutory right of access to carry out work on their assets, subject to notice. This may result in employees of the Company or its contractors needing to enter the property to carry out work.

Question 3.3

Is any water main or service pipe serving, or which is proposed to serve the property, the subject of an existing adoption agreement or an application for such an agreement?

Records confirm that water mains or service pipes serving the property are not the subject of an existing adoption agreement or an application for such an agreement.

Guidance Notes

Where the property is part of a very recent or ongoing development and the water mains and service pipes are not the subject of an adoption application, buyers should consult with the developer to confirm that the Water Undertaker will be asked to provide a water supply to the development or to ascertain the extent of any private water supply system for which they will hold maintenance and renewal liabilities.

Question 3.4

Is the property at risk of receiving low water pressure or flow?

Records confirm that the property is not recorded on a register kept by the Water Undertaker as being at risk of receiving low water pressure or flow.

Guidance Notes

'Low water pressure' means water pressure below the regulatory reference level which is the minimum pressure when demand on the system is not abnormal. Water Undertakers are required to include in the Regulatory Register that is reported annually to the Water Services Regulation Authority properties receiving pressure below the reference level, provided that allowable exclusions do not apply (i.e. events which can cause pressure to temporarily fall below the reference level). Water Companies are required to include in the Regulatory Register that is reported annually to the Director General of Water Services properties receiving pressure below the reference level, provided that allowable exclusions do not apply (i.e. events which can cause pressure to temporarily fall below the reference level). The reference level of service is a flow of 9 litres/minute at a pressure of 10 metres head on the customer's side of the main stop tap (mst). The reference level of service must be applied on the customer's side of a meter or any other company fittings that are on the customer's side of the main stop tap. The reference level applies to a single property. Where more than one property is served by a common service pipe, the flow assumed in the reference level must be appropriately increased to take account of the total number of properties served. For two properties, a flow of 18 litres/minute at a pressure of 10 metres head on the customer's side of the mst is appropriate. For three or more properties the appropriate flow should be calculated from the standard loadings provided in BS806-3 or Institute of Plumbing handbook. Allowable exclusions: The Company is required to include in the Regulatory Register properties receiving pressure below the reference level, provided that allowable exclusions listed below do not apply. Abnormal demand: This exclusion is intended to cover abnormal peaks in demand and not the daily, weekly or monthly peaks in demand which are normally expected. Companies should exclude from the reported DG2 figures properties which are affected by low pressure only on those days with the highest peak demands. During the report year Companies may exclude, for each property, up to five days of low pressure caused by peak demand. Planned maintenance: Companies should not report under DG2 low pressures caused by planned maintenance. It is not intended that Companies identify the number of properties affected in each instance. However, Companies must maintain sufficiently accurate records to verify that low pressure incidents that are excluded from DG2 because of planned maintenance are actually caused by maintenance. One-off incidents: This exclusion covers a number of causes of low pressure, mains bursts, failures of Company equipment (such as PRVs or booster pumps), firefighting and action by a third party. However, if problems of this type affect a property frequently, they cannot be classed as one-off events and further investigation will be required before they can be excluded.

Question 3.5

What is the classification of the water supply for the property?

The water supplied to the property has an average water hardness of 66.03 mg/l calcium which is defined as Moderately Hard by Severn Trent Water.

See Details

Guidance Notes

Neither hard nor soft water is considered to pose any risk to health. Hardness comes from naturally occurring calcium and magnesium mineral salts which are dissolved from the rocks through which rain water flows. Hardness is expressed as the equivalent amount of calcium carbonate in parts per million (mg/l). Hard water causes scaling in hot water systems, kettles, electric irons and domestic appliances. Scaling of heating elements may shorten their life and may make appliances less efficient. More information is available on the water undertaker's website.

Question 3.6

Please include details of the location of any water meter serving the property.

Records indicate that the property is not served by a water meter. Where the property is not served by a meter and the customer wishes to consider this method of charging they should contact:

Severn Trent Water
PO Box 5310
Coventry
CV3 6SD

Tel: 0345 7500 500 For Billing Enquiries only
Tel: 0345 7090 646 For Metering Enquiries only
Tel: 0115 971 3550 For Search Enquiries only

<http://www.stwater.co.uk>

N/A

Question 4.1.1

Who is responsible for providing the sewerage services for the property?

The Sewerage Undertakers for the area are:

Severn Trent Water
PO Box 5310
Coventry
CV3 6SD

Tel: 0345 7500 500 For Billing Enquiries only
Tel: 0345 7090 646 For Metering Enquiries only
Tel: 0115 971 3550 For Search Enquiries only

<http://www.stwater.co.uk>

See Answer

Question 4.1.2

Who is responsible for providing the water services for the property?

The Water Undertakers for the area are:

Severn Trent Water
PO Box 5310
Coventry
CV3 6SD

Tel: 0345 7500 500 For Billing Enquiries only
Tel: 0345 7090 646 For Metering Enquiries only
Tel: 0115 971 3550 For Search Enquiries only

<http://www.stwater.co.uk>

See Answer

Question 4.2

Who bills the property for sewerage services?

The property is billed for sewerage services by:

Severn Trent Water
PO Box 5310
Coventry
CV3 6SD

Tel: 0345 7500 500 For Billing Enquiries only
Tel: 0345 7090 646 For Metering Enquiries only
Tel: 0115 971 3550 For Search Enquiries only

<http://www.stwater.co.uk>

If your property was built after April 1989 you will be paying for water services on a measured basis. Householders that opted, at their present address, for a meter before 1 April 1996 can revert to paying by rateable value provided that the property still has a valid rateable value. Householders that opted, at their present address, for a meter after 1 April 2000 can revert to paying by rateable value at any time prior to the twelve month anniversary of the meter having been installed or 30 days after receipt of a second measured bill, provided that the property still has a valid rateable value. Properties that have a swimming pool or use an automatic garden watering device (i.e. a hosepipe not held in the hand) must be metered. Household measured bills are sent half yearly. All non-households are required to be metered.

Question 4.3

Who bills the property for water services?

The property is billed for water services by:

Severn Trent Water
PO Box 5310
Coventry
CV3 6SD

Tel: 0345 7500 500 For Billing Enquiries only
Tel: 0345 7090 646 For Metering Enquiries only
Tel: 0115 971 3550 For Search Enquiries only

<http://www.stwater.co.uk>

If your property was built after April 1989 you will be paying for water services on a measured basis. Householders that opted, at their present address, for a meter before 1 April 1996 can revert to paying by rateable value provided that the property still has a valid rateable value. Householders that opted, at their present address, for a meter after 1 April 2000 can revert to paying by rateable value at any time prior to the twelve month anniversary of the meter having been installed or 30 days after receipt of a second measured bill, provided that the property still has a valid rateable value. Properties that have a swimming pool or use an automatic garden watering device (i.e. a hosepipe not held in the hand) must be metered. Household measured bills are sent half yearly. All non-households are required to be metered.

Question 4.4

What is the current basis for charging for sewerage and water services at the property?

The charges are based on the rateable value of the property of 267.00 and the charge for the current financial year is £671.53.

Unmeasured

Guidance Notes

Water and Sewerage Companies full charges are set out in their charges schemes which are available from the Company free of charge upon request . The Company may install a meter at the premises where a buyer makes a change of use of the property or where the buyer uses water for watering the garden, other by hand (this includes the use of sprinklers) or automatically replenishing a pond or swimming pool with a capacity greater than 10,000 litres.

Question 4.5

Will the basis for charging for sewerage and water services at the property change as a consequence of a change of occupation?

The undertaker has the power to install a water meter at a property as a consequence of a change of occupation at any time under Section 144B of the Water Industry Act (1991). However there will be no change in the current charging arrangements as a consequence of a change of occupation.

See Details

Guidance Notes

Water and Sewerage Companies full charges are set out in their charges schemes which are available from the Company free of charge upon request . The Company may install a meter at the premises where a buyer makes a change of use of the property or where the buyer uses water for watering the garden, other than by hand (this includes the use of sprinklers) or automatically replenishing a pond or swimming pool with a capacity greater than 10,000 litres.

Question 5.1

What is the risk of flooding from rivers and the sea within 25 m of the property?

Flood risk from rivers and the sea has not been identified within 25m of the property.

Guidance Notes

The answer is based on the Environment Agency's Risk of Flooding from Rivers and Sea dataset, which indicates the risk of flooding from an extreme flood event (1 in 1000 or 0.1% chance in any given year). Low indicates a 1 in 200 chance or less, moderate indicates a 1 in 75 to 1 in 200 chance, and significant indicates higher than a 1 in 75 chance of flooding from rivers and the sea in any given year. Any flood defences and their condition are taken into account.

Question 5.2

Is the property in or within 25m of an area benefiting from flood defences?

As the property is not identified as at risk from flooding from the rivers or the sea, flood defence information is not applicable.

Guidance Notes

This answer is based on the Environment Agency dataset and indicates land that may benefit from the presence of major flood defences during a 1% fluvial or 0.5% tidal flood event.

Question 5.3

What is the risk of surface water flooding within 25m of the property?

The risk of surface water flooding within 25m of the property is Low, with potential for depths of 0.01m to 0.1m during a 1000 year rainfall event.

Guidance Notes

The answer is derived from a model by JBA Risk Management using the anticipated water volumes expected during a 1 in 1000 year return period rainfall event. The risk is classified by JBA into four categories, negligible (below 0.01m), low (0.01m - 0.1m), medium (0.1m - 0.3m), high (0.3m - 1m) or very high (greater than 1m) which reflect varying depths of potential surface water flooding.

Question 5.4

What is the susceptibility of the property to potential groundwater flooding?

The susceptibility of the property to potential groundwater flooding is low. This indicates limited potential for groundwater flooding to occur.

Guidance Notes

This answer is based upon the British Geological Survey Suceptibility to groundwater flooding dataset, which identifies where geological conditions could enable groundwater flooding to occur. This is to highlight where further investigation might be needed and cannot be used in isolation, to indicate risk of groundwater flooding. Low indicates limited potential for Groundwater Flooding to occur. Medium signifies potential for Groundwater Flooding of property situated below ground level and high indicates potential for Groundwater Flooding to occur at surface.

Question 5.5

What is the insurance claim rating for the property?

The insurance claim rating for the property is very low. No flood related insurance claims have been made in this postcode sector.

Guidance Notes

Crawford & Co have compiled information in over 9,000 postcode sectors regarding the number of insurance claims made as a result of flooding. The risk has been classified into five categories; very low (no claims), low (less than 2 claims per 1000 households), medium (between 2 and 5 claims per 1000 households) and high (more than 5 claims per 1000 households). This information is not necessarily comprehensive and excludes flood claims arising as a result of burst pipes and domestic appliances.

Key Facts

The search report was prepared following examination of either the following original records or summary records derived from the original: the Map of Public Sewers, the Map of Waterworks, Water and Sewer Billing Records, Adoption of Public Sewer Records, Building Over Public Sewer Records, the Register of Properties subject to Internal Foul Flooding, the Register of Properties subject to Poor Water Pressure and the Drinking Water Register. Should the property not fall entirely within the Severn Trent Water or Hafren Dyfrdwy Regions, a copy of the records held by South Staffordshire Water or other relevant Water Company will be searched also. Severn Trent Searches is responsible for the accuracy of the information contained within the search report.

Flood information provided for questions 5.1 - 5.5 is provided by Landmark - Full Terms and Conditions can be found on the following link : <http://landmarkinfo.co.uk/Terms/Show/515>

DEFINITIONS

'Client' means the person who is the intended recipient of the Report with an actual or potential interest in the Property.

'Company' means Severn Trent Property Solutions, the company producing the Report.

'Customer' means the person placing the Order, either on its own behalf as Client, or, as an agent for or a reseller to a Client.

TERMS AND CONDITIONS

The customer agrees that the placing of an order for a report indicates acceptance of the full terms and conditions (Appendix 5).

This Report should only be used where the subject Property is either:

- A single, existing residential, domestic property
- Land being developed as a single, residential, domestic property

The Report is produced solely for use by the Client for the identification of the location and connection of existing drainage and/or water services at the Property. It should not be used as a substitute for physical investigation or inspection

We do not give details about the actual state or condition of the Property or the existing drainage and/or water services.

The position and depth of any Apparatus shown on any maps is approximate, and is intended as a general guide.

The Company shall have no liability for any inaccuracy in respect of the position of the Apparatus shown on any map.

The information contained in the Report is dependent upon the accuracy of the property information supplied by the Customer or Client.

PAYMENT

Unless otherwise stated all prices are inclusive of VAT. The Customer shall pay the price of the Report specified by the Company, without any set off, deduction or counterclaim.

Unless the Customer or Client has an account with us, we must receive payments in full before the Report is produced.

LIMITATION OF LIABILITY

The Company accepts no responsibility for and excludes its liability for:

- any inaccuracy or error in the Report based on incomplete or inaccurate information supplied by the Customer and/or the Client;
- any use of the Report by the Customer for any purpose other than the intended;
- any inaccuracy or error in information provided by any Third Party Undertaker; or
- any change in the location and connection of existing drainage and/or water services at the Property after the date stated in the Report.

LANDMARK TERMS AND CONDITIONS

Flood information provided for questions 5.1 - 5.5 is provided by Landmark.

Full Terms and Conditions can be found on the following link :

<http://www.landmarkinfo.co.uk/Terms/Show/515>

If you experience difficulties accessing the Terms & Conditions, if you copy and paste the link directly into your browser, you will be able to access our Terms & Conditions from there.

Should you still experience difficulties, then please telephone their Customer Service Team on 0844 844 9966.

Terms and Expressions in this Report

'the 1991 Act' means the Water Industry Act 1991[61];

'the 2000 Regulations' means the Water Supply (Water Quality) Regulations 2000[62];

'the 2001 Regulations' means the Water Supply (Water Quality) Regulations 2001[63];

'adoption agreement' means an agreement made or to be made under Section 51A(1) or 104(1) of the 1991 Act[64];

'bond' means a surety granted by a developer who is a party to an adoption agreement;

'bond waiver' means an agreement with a developer for the provision of a form of financial security as a substitute for a bond;

'calendar year' means the twelve months ending 31st December;

'discharge pipe' means a pipe which discharges are made or are to be made under Section 165(1) of the 1991 Act;

'disposal main' means (subject to section 219(2) of the 1991 Act) any outfall pipe or other pipe which - (a) is a pipe for the conveyance of effluent to or from any sewage disposal works, whether of a Sewerage Undertaker or of any other person; and (b) is not a public sewer;

'drain' means (subject to Section 219(2) of the 1991 Act) a drain used for the drainage of one building or of any buildings or yards appurtenant to buildings within the same curtilage;

'effluent' means any liquid, including particles of matter and other substance in suspension in the liquid;

'financial year' means the twelve months ending with 31st March;

'lateral drain' means - (a) that part of a drain which runs from the curtilage of a building (or buildings or yards within the same curtilage) to the sewer with which the drain communicates or is to communicate; or (b) (if different and the context so requires) the part of a drain identified in a declaration of vesting made under Section 102 of the 1991 Act or in an agreement made under Section 104 of that Act[65];

'licensed water supplier' means a company which is the holder for the time being of a water supply license under Section 17A(1) of the 1991 Act[66];

'maintenance period' means the period so specified in an adoption agreement as a period of time - (a) from the date of issue of a certificate by a Sewerage Undertaker to the effect that a developer has built (or substantially built) a private sewer or lateral drain to that Undertakers satisfaction; and (b) until the date that private sewer or lateral drain is vested in the Sewerage Undertaker;

'map of waterworks' means the map made available under Section 198(3) of the 1991 Act[67] in relation to the information specified in subsection (1A);

'private sewer' means a pipe or pipes which drain foul or surface water, or both, from premises, and are not vested in a Sewerage Undertaker;

'public sewer' means, subject to Section 106(1A) of the 1991 Act[68], a sewer for the time being vested in a Sewerage Undertaker in its capacity as such, whether vested in that Undertaker - (a) by virtue of a scheme under Schedule 2 to the Water Act 1989[69]; (b) by virtue of a scheme under Schedule 2 to the 1991 Act[70]; (c) under Section 179 of the 1991 Act[71]; or (d) otherwise;

'public sewer map' means the map made available under Section 199(5) of the 1991 Act[72];

'resource main' means (subject to Section 219(2) of the 1991 Act) any pipe, not being a trunk main, which is or is to be used for the purpose of - (a) conveying water from one source of supply to another, from a source of supply to a regulating reservoir or from a regulating reservoir to a source of supply; or (b) giving or taking a supply of water in bulk;

'sewerage services' includes the collection and disposal of foul and surface water and any other services which are required to be provided by a Sewerage Undertaker for the purpose of carrying out its functions;

'Sewerage Undertaker' means the company appointed to be the Sewerage Undertaker under Section 6(1) of the 1991 Act for the area in which the property is or will be situated;

'surface water' includes water from roofs and other impermeable surfaces within the curtilage of the property;

'water main' means (subject to Section 219(2) of the 1991 Act) any pipe, not being a pipe for the time being vested in a person other than the Water Undertaker, which is used or to be used by a Water Undertaker or licensed water supplier for the purpose of making a general supply of water available to customers or potential customers of the Undertaker or supplier, as distinct from for the purpose of providing a supply to particular customers;

'water meter' means any apparatus for measuring or showing the volume of water supplied to, or of effluent discharged from any premises;

'water supplier' means the company supplying water in the water supply zone, whether a Water Undertaker or licensed water supplier;

'water supply zone' in relation to a calendar year, means the names and areas designated by a Water Undertaker within its area of supply that are to be its water supply zones for that year.

'Water Undertaker' means the company appointed to be the Water Undertaker under Section 6(1) of the 1991 Act for the area in which the property is or will be situated.

In this Report, references to a pipe, including references to a main, a drain or a sewer, shall include references to a tunnel or conduit which serves or is to serve as the pipe in question and to any accessories for the pipe.

Private sewer transfer - notes for property owners and conveyancers

The transfer

The private sewer transfer occurred in October 2011, and was designed to bring the majority of private sewers in England and Wales into public ownership.

Drains, lateral drains and sewers - definitions

A drain is a disposal pipe serving a single property or properties (such as flats) within a single curtilage. A lateral drain is any section of that drain which extends beyond the curtilage of the property. A sewer is a disposal pipe serving two or more separate properties. Full legal definitions of these terms can be found in

Assets transferred into public ownership

The majority of all sewers and lateral drains which were connected to the public system prior to 1st July 2011 transferred into public ownership on 1st October 2011. Water companies were given five years to identify and adopt private pumping stations and associated apparatus, ending in October 2016.

Assets not transferred into public ownership

Some assets were excluded from the transfer, including:

Any assets not connected prior to 1st July 2011. These will transfer under a secondary scheme at a later date.

Drains within the boundary of the property they serve.

Sewers on Crown Land (such as prisons) where notice has been received from the relevant authority that the sewers should be exempt.

Sewers owned by railway authorities.

Sewers and drains which do not discharge to the public system, such as Sustainable Drainage Systems.

Drainage systems contained within a single property curtilage (e.g. retail parks, caravan parks).

Private pumping stations and associated pressurised mains which serve one property.

Private treatment works, septic tanks and cesspits.

Appeals

Any owner of a private sewer, lateral drain or pumping station had the right to appeal to OFWAT to retain ownership. These had to be lodged before 30th September 2011* OFWAT then determined whether the asset in question should be exempt from the transfer. During the appeal process, the asset remained private.

*Appeals process differs slightly for pumping stations, Visit OFWAT's website for more details (ofwat.gov.uk).

Procedures for new sewers

The Flood and Water Management Act 2010

Once Section 42 of the Flood and Water Management Act 2010 comes into force, adoption of all new sewers which connect to the public network will be mandatory. A new national Mandatory Build Standard will also be introduced specifying the standards to which new sewers must be built.

Issues for property owners

Liability

Since the transfer, the majority of property owners have a greatly reduced liability for repairs to the drainage system. Should the search indicate the property is not connected to mains drainage or that there are no public assets nearby, it is recommended that further investigations be made into the drainage arrangements, as the property owner may have a substantial liability.

Sewers within property boundaries

The transfer resulted in a greater number of public sewers and lateral drains within property boundaries, many of which are not plotted on the Public Sewer Map.

Property owners need to be aware that Severn Trent Water have statutory rights of access to land where their assets are located should they need to access the mains.

Developing Properties

Building over or close to a public asset requires consent from Severn Trent Water. This includes transferred private sewers and lateral drains within property boundaries. Full details can be found on the Severn Trent Water website. Should you wish to develop a property, Severn Trent Searches are able to arrange a survey of both private and public drainage systems. This survey meets the required standard to accompany an application to build over or close to a public sewer made to Severn Trent Water.

What to do if there is a blockage in the Sewer within the property boundary

If there is a problem with a pipe within the property boundary, the occupier should call Severn Trent Water on 0800 783 4444. The Sewerage Undertaker will then decide whether this is a private matter or if they are responsible. The Sewerage Undertaker may charge the homeowner for clearing a blockage etc for which they are not responsible. Any works needed would be agreed beforehand.

Updates to the CON29DW

Section 104 sites

The transfer applied to sites undergoing adoption under Section 104 of the Water Industry Act (1991). However, some assets on these sites, such as pumping stations, sewers connected after July 2011 and surface water sewers not connecting to the public system, were not included in the transfer. In these circumstances the search will continue to show a Section 104 agreement in place.

Sewers and lateral drains within property boundaries

Because private sewers were not previously required to be recorded on the public sewer records there are circumstances when we are unable to confirm the location of transferred sewers. On these occasions, the CON29DW report will advise as to whether there is likely to be a public asset within the boundary.

Proximity of sewers to the property

The majority of properties particularly within urban areas, will have public sewers within 100 feet (30.48 metres). In the case of transferred assets not being shown on public sewer record, there will be occasions when we are unable to confirm this. In these circumstances we will advise whether there are likely to be assets in close proximity to the property. The absence of nearby public sewers could result in a property owner having a substantial liability for repairs to the drainage system.

Building over public sewers

A number of formerly private sewers have been built over and are now the responsibility of Severn Trent Water. Although the search will highlight whether there has been a build over enquiry to Severn Trent Water, this will only apply to sewers which were public at the time of development.

Sewer flooding

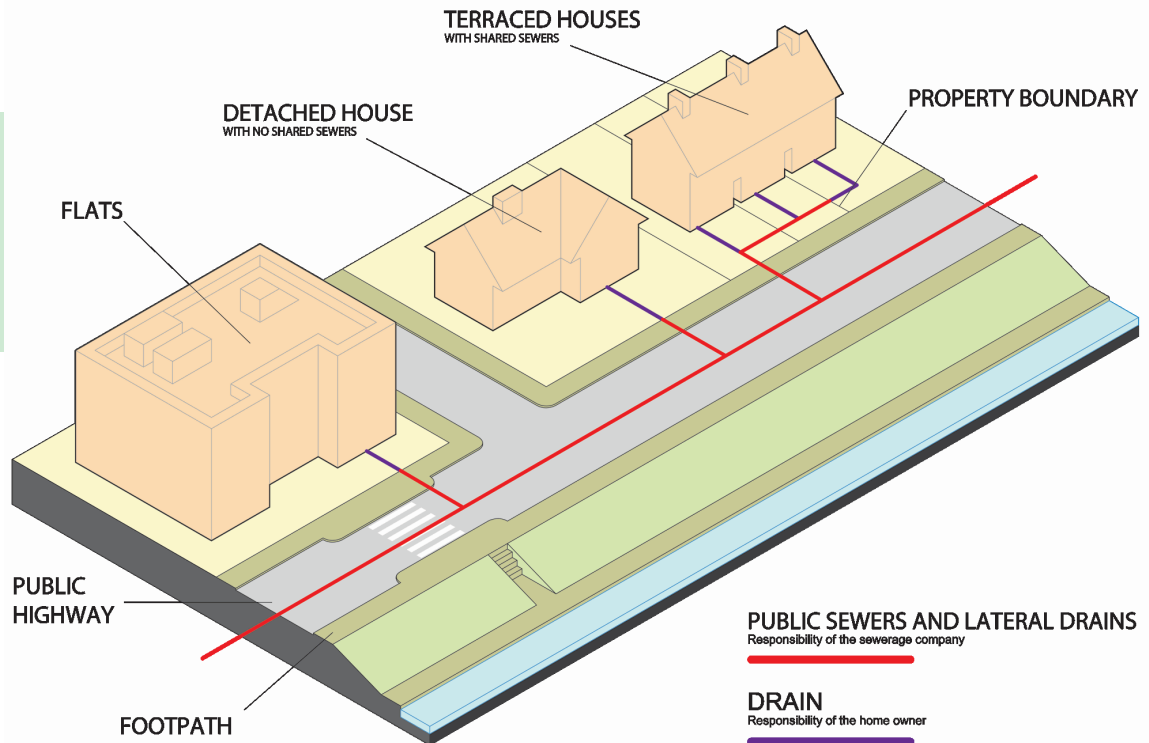

Whilst the search will still report the risk of sewer flooding to a property, following the transfer there is the possibility of sewer flooding from transferred sewers which will not have been previously recorded. The register will be updated as and when there is an occurrence.

Pumping Stations

The search indicates whether a transferred pumping station is located either within a property boundary, or within 50 metres of the property. Transferred pumping stations - which will not always have been built to Severn Trent Water's standards - initially require regular inspection and maintenance, which may prove disruptive. On occasion, there may be private pumping stations of which we are unaware. In these instances, please contact Severn Trent Water on 0800 783 444 or email privatepumpingstations@severntrent.co.uk

Typical Examples

This diagram reflects some common scenarios following the sewer transfer.

Terraced Properties

It is common for terraced properties to have a public sewer passing within the property boundary. There are some exceptions, such as an end terrace upstream of neighbouring properties as the section of drain will only serve that one property and so will remain private. Besides the situation shown in the diagram, a common alternative arrangement is for terraced houses to be served by a shared sewer to the rear which may also run in passageways between properties to join the main sewer in the highway.

Semi-detached

The majority of semi-detached properties are connected to the public sewer via a shared connection. The section of drain which serves both properties is now public. Typically, the public sewer will be within the boundary of the property which is downstream on the drainage system as most sewers work on a gravity system.

Detached Properties

It is common for most detached properties to be connected to the public sewer via a direct connection. Therefore, for many detached properties it is unlikely that assets within the boundary of the property will have transferred. But the individual drainage arrangements at a specific property should be checked if details are required.

Flats/Apartments

Any shared drainage systems within a property curtilage remain private. This means with flats, only drains and sewers outside the boundary have transferred.

Residential Drainage and Water Search Complaint Procedure

As a minimum standard Severn Trent Searches, PO Box 10155, Nottingham, NG1 9HQ:

Will endeavour to resolve any telephone contact or complaint at the time of the call. However, if that isn't possible, we will investigate and research the matter in detail and provide a written response within 5 working days of receipt of your complaint.

Depending on the scale of investigation required, we will keep you informed of the progress and update you with new timescales if necessary.

If we fail to give you a written substantive response within 5 working days Severn Trent Searches will compensate our client the original fee paid for a Severn Trent CON29DW Drainage and Water enquiry, regardless of the outcome of your complaint.

If we find your complaint to be justified, or we have made any errors that substantially change the outcome in your search result, we will automatically refund the search fee to the ordering party. We will provide them with a revised search and also undertake the necessary action, as within our control, to put things right as soon as practically possible. Customers will be kept informed of the progress of any action required.

If the search takes us longer than 10 working days to complete and we have not communicated the reasons for the delay we will provide the search free of charge.

A complaint will normally be dealt with fully within 20 working days of the date of its receipt. If there are valid reasons for the consideration taking longer you will be kept fully informed in writing or via telephone or email, as you prefer, and receive a proposed solution or final response at the very latest within 40 working days.

If you are still not satisfied with our response or action we will refer the matter to a Senior Manager/ Company Director for resolution. At your request we will liaise with a representative acting on your behalf.

If you are not satisfied with the resolution offered in the final response or the timescale* within which the final response or proposed solution was issued, you may refer the complaint to an independent body of your choice. We will co-operate fully with the independent adjudicator during the consideration of a complaint and comply with any decision.

*40 working days

Complaints should be sent to:

Terms and Conditions

These Terms govern the basis on which the Report is supplied and the basis upon which the Customer and the Client have relied upon the Report.

Definitions

'Apparatus' means the sewers, disposal mains or lateral drains, water mains, resource mains or discharge pipes and associated infrastructure for which an Undertaker holds statutory responsibility under the Water Industry Act 1991 shown on the map attached to the Report;
'Client' means the person who is the intended recipient of the Report with an actual or potential interest in the Property including their mortgage lender.
'Company' means Severn Trent Property Solutions, the company producing the Report.
'Customer' means the person placing the Order, either on its own behalf as Client, or, as an agent for or a reseller to a Client.

'Order' means any request completed by the Customer requesting the Report in accordance with the Company's order placed on the Report.

'Report' means the drainage and/or water report prepared by the Company in respect of the Property.

'Partner Undertakers' means Severn Trent Water Ltd, Hafren Dyfrdwy Ltd or South Staffordshire Water Plc.

'Person' means any individual, firm, body corporate, unincorporated association or partnership.

'Property' means the address or location supplied by the Customer in the Order which satisfies one or more of the requirements set out in paragraph 2.1.

'Purpose' shall have the meaning set out in paragraph 2.2.

'Terms' means these Drainage and Water Enquiry (DOMESTIC) Terms and Conditions.

'Third Party Undertaker' means any Undertaker other than a Partner Undertaker.

'Undertaker' means a Sewerage and/or Water Undertaker (both as defined in the Water Industry Act 1991) providing water and sewerage services.

1. Agreement

1.1 The Company agrees to supply the Report to the Customer and, if applicable, the Customer shall provide the Report to the Client, subject to these Terms to the exclusion of all other terms and conditions including any terms and conditions which the Customer and/or Client purports to apply under any Order, confirmation of Order or any other document. The scope and limitations of the Report are described in paragraph 2 of these Terms.

1.2 Where the Customer is not the Client, then the Customer shall ensure that these Terms are brought to the attention of the Client on or prior to the Customer placing the Order and that the Terms are provided with any copy of the Report provided by the Customer to the Client. The Customer is responsible for making sure that the Client is aware of the limitations and exclusions that are contained in these Terms and must draw the Client's attention to any disclaimers set out in the Report.

1.3 The Customer agrees that the placing of an Order for a Report indicates its acceptance of these Terms.

1.4 Where the Customer is placing an Order on behalf of a Client, it warrants and represents to the Company that it is authorised to accept these Terms on behalf of the Client and to bind the Client to these Terms.

2. The Report

2.1 This Report (unless part of a Residential Multisite CON29DW Drainage & Water Enquiry) should only be used where the Property, which is the subject of the Report, is:

2.1.1 a single, residential, domestic property
2.1.2 land or buildings being, or to be developed, as a single, residential, domestic property
2.1.3 not for carrying out any trade, business or commercial activities.

2.2 The Report is produced solely for use by the Client for the intended purpose of the Report (the "Purpose"). The Purpose is the identification of the location and connection of existing drainage (save that which is identified in clause 2.3.7) and/or water services at the Property in relation to the individual domestic property transaction in respect of the Property which is in the contemplation of the Client at the time of ordering the Report the Company shall not be liable in any circumstances in connection with the Report if it is used for any other purpose.

2.3 Whilst the Company will use its reasonable skill and care in producing the Report, it is provided to the Customer on the basis that the Customer and the Client acknowledge and agree to the following:-

2.3.1 the information contained in the Report details only the location and connection of existing drainage and/or water services at the Property at the date stated in the Report;

2.3.2 the Company's obligation in respect of the Report is to correctly reproduce and compile the information provided by the Partner Undertakers and any Third Party Information (in accordance with paragraph 3.5);

2.3.3 the Report does not give details about the actual state or condition of the Property or the existing drainage and/or water services nor should it be used or taken to indicate actual suitability or unsuitability of the Property for any particular purpose, or relied upon for determining saleability or value, or used as a substitute for any physical investigation or inspection. Further advice and information from appropriate experts and professionals should always be obtained if the Customer or the Client requires;

2.3.4 the information contained in the Report is dependent upon the accuracy of the information supplied by the Customer or Client including, but not limited to the address of the Property and any plan of the Property;

2.3.5 the statements in the Report marked as "Guidance Notes" are intended to be general statements and advice in addition to the report on the Property. The Company cannot ensure that any such guidance notes are accurate, complete or valid and accepts no liability for such general statements and advice provided; and

2.3.6 the position and depth of any Apparatus shown on any maps attached to the Report is approximate, and is intended as a general guide only and no warranty as to its correctness is given or implied and the Company shall have no liability for any inaccuracy in respect of the position of the Apparatus shown on any map. The exact positions and depths should be obtained by excavation trial holes and the maps must not be relied on in the event of excavation or other works made in the vicinity of the Apparatus.

2.3.7 subject to the terms of this agreement, the Company is not liable to the Customer or the Client where the report does not provide details about the private sewers, drains, lateral drains, pumping stations and any associated apparatus that have transferred into the Undertaker and/or Partnership Undertaker's and/or the Third Party Undertaker's ownership as a direct result of the 'The Water Industry (Schemes for Adoption of Private Sewers) Regulations 2011' and which are not shown on the public sewer record at the point at which the search was completed.

2.4 The Client and/or Customer shall notify the Company as soon as is practicable if it becomes aware of any defect or inaccuracy in the Report.

3. Limitation of Liability

3.1 The Company does not exclude its liability (if any) to the Customer and/or the Client:

3.1.1 for personal injury or death resulting from the Company's negligence;

3.1.2 for any matter for which it would be illegal for the Company to exclude or to attempt to exclude its liability;

3.1.3 for fraud or fraudulent misrepresentation;

3.1.4 for breach of its obligations arising under Section 2 Supply of Goods and Services Act 1982; or

3.1.5 arising under Section 2(3) Consumer Protection Act 1987.

3.2 Subject to paragraph 3.1 the Company accepts no responsibility for and excludes its liability (whether for breach of contract, negligence or any other tort, under statute or statutory duty, restitution or otherwise at all) for:

3.2.1 any inaccuracy or error in the Report based on incomplete or inaccurate information supplied by the Customer and/or the Client;

3.2.2 any use of the Report by the Customer for any purpose other than the Purpose;

3.2.3 any inaccuracy or error in information provided by any Third Party Undertaker; or

3.2.4 any change in the location and connection of existing drainage and/or water services at the Property after the date stated in the Report.

3.3 The Company shall not be in breach of these Terms or otherwise liable to the Customer and/or the Client for any failure to provide or delay in providing the Report to the extent that such failure or delay is due to an event or circumstance beyond the reasonable control of the Company including but not limited to any delay, failure of or defect in any machine, processing system or transmission link or any failure or default of a supplier or sub-contractor of the Company or any provider of any third party Information except to the extent that such failure or delay is caused by the negligence of the Company.

3.4 Where the Customer sells this Report to a Client under its own name or as a reseller of the Company (other than in the case of a bona fide legal adviser recharging the cost of the Report as a disbursement) the Company shall not in any circumstances (whether for breach of contract, negligence or any other tort, under statute or statutory duty, restitution or otherwise at all) be liable to the Customer for any loss (whether direct, indirect or consequential loss (all three of which terms include without limitation, pure economic loss, loss of profit, loss of business, depletion of goodwill and like loss)) or damage whatsoever caused in respect of the Report or any use of the Report or reliance placed upon it and the Customer shall indemnify and keep indemnified the Company in respect of any claim by the Client that the Company may incur or suffer.

3.5 Where the Property falls within a geographical area where two or more different Undertakers provide water and sewerage services, the Company shall use extracts from reports provided by Third Party Undertakers in respect of the part of the Property that falls within the provision of services by Third Party Undertakers and such information shall not be produced specifically for the Company ("Third Party Information"). Liability for accuracy of the Third Party Information used for the purpose of the Report will remain with that Third Party Undertaker and is subject to the Third Party Undertakers' terms and conditions of supply of such reports. The Company gives no warranty as to the correctness, accuracy or completeness of the Third Party Information and provided that the Company reproduces the Third Party Information in the Report correctly, the Company excludes all liability (whether for breach of contract, negligence or any other tort, under statute or statutory duty, restitution or otherwise) for any Third Party Information, subject to clause 3.1 and 3.2

4. Copyright and Confidentiality

4.1 The Customer acknowledges and where the Customer is not the Client, the Customer shall procure that the Client acknowledges that the Report is confidential to the Customer and/or the Client and may only be used by the Customer and/or the Client for the Purpose and the proper performance of these Terms.

4.2 The copyright and any other intellectual property rights in the Report shall remain the property of the Company. No intellectual or other property rights are transferred or licensed to the Customer or the Client except to the extent expressly provided in these Terms. The maps contained in the Report are protected by Crown Copyright and must not be used for any purpose not anticipated by the Report.

4.3 The Customer and the Client are entitled to make copies of the Report for the Purpose but may only copy Ordnance Survey mapping or data contained in or attached to the Report if it has an appropriate licence from the originating source of that mapping or data.

4.4 The Customer agrees and where the Customer is not the Client, the Customer shall procure that the Client agrees, (in respect of both the original and any copies made) to respect and not to alter any trademark, copyright notice or other property marking which appears on the Report.

4.5 The enquiries contained in the Report are protected by copyright owned by the Law Society of 113 Chancery Lane, London WC2A 1PL and must not be used for any purpose outside the context of the Report.

4.6 The Customer agrees and where the Customer is not the Client, the Customer shall procure that the Client agrees to indemnify and keep indemnified the Company against any losses, costs, claims and damage suffered by the Company as a result of any breach by either of them of the terms of paragraphs 4.1 to 4.4 inclusive.

4.7 The obligation to procure the compliance of the Client to the obligations set out in this paragraph 4 and in paragraph 6.5 shall not apply to Customers who are bona fide legal advisers recharging the cost of the Report to the Client as a disbursement.

5. Payment

5.1 Unless otherwise stated all prices are inclusive of VAT. The Customer shall pay the price of the Report specified by the Company, without any set off, deduction or counterclaim. Unless the Customer or Client has an account with the Company for payment for Reports, the Company must receive payments for Reports in full before the Report is produced. For Customers or Clients with accounts, payment terms will be as agreed with the Company.

6. General

6.1 If any provision of these Terms is or becomes invalid or unenforceable, it will be taken to be removed from the rest of these terms to the extent that it is invalid or unenforceable. No other provision of these terms shall be affected.

6.2 Any failure by the Company to enforce any breach of the Terms shall not be deemed to be a waiver of any future breach of the Terms by the Customer or Client.

6.3 These Terms shall be governed by English law and all parties submit to the exclusive jurisdiction of the English courts.

6.4 Nothing in these Terms shall in any way restrict the Customer or Client's statutory or any other rights of access to the information contained in the Report.

6.5 The Company and the Customer agree and where the Customer is not the Client, the Customer shall procure that the Client agrees that these Terms contain all the terms which the Company and the Customer and/or the Client have agreed in relation to the subject matter of these Terms and supersede any prior written or oral agreements, representations or understandings between any of them in relation to such subject matter. Nothing in this paragraph 6.5 will exclude any liability which one party would otherwise have to another party in respect of any statements made fraudulently.

6.6 The Company may assign, delegate, licence, hold on trust or sub-contract all or any part of its rights and obligations under these Terms. The Customer/Client is not permitted to assign all or any part of its rights and obligations under these Terms and/or under the Report.

Severn Trent Searches is a trading name of Severn Trent Property Solutions. Registered in England and Wales no 2562471 Registered office, Severn Trent Centre, 2 St John's Street, Coventry, CV1 2LZ.
