Severn Trent Sewage Map

Severn Trent is one of the world’s leading water, wastewater and utility services companies (company codes: LBS: Listings and fraud prevention, and LBF: commercial). It is a leading provider of sewerage services in the UK, serving a community of more than 4.1 million people, primarily in England and Wales.

Severn Trent Sewage is part of the Severn Trent Plc group and is the largest provider of wastewater services in the Midlands. It serves an area of approximately 11,000 square miles (28,000 square kilometers) and is responsible for the drainage and wastewater management of more than 1.5 million properties.

The Company supplies sewerage to over 10 million people across a range of areas, including open sewers, foul sewers, combined sewers, and drainage systems. The Company is committed to providing a high standard of service, efficiency, and reliability. It operates a network of pumping stations and treatment works to ensure the safe and effective management of waste and sewage.
